A VISIT "BEHIND THE SCENES" OF A LONG HISTORY.

The visit to an Italian tailor's shop will not be a simple guided tourthe public will participate as in a theatrical performance: dreams, passions and curiosities will be told exactly as in a show and the actors will be the owners themselves while the visitor will quietly travel through the atelier. Sartoria Orefice, founded in 1856, preserves stories and curiosities of royalty, entrepreneurs, artists, politicians, actors and sportsmen that it has dressed during their stay in Italy. A visit/show between past, future and culture where you can also discover your own style: during the visit will be revealed small practical tips of sewing and custom dress codes to conform to any occasion.

AN EXPERIENCE OF MADE IN ITALY: the double life of a silk thread.

The experience will begin with a tour of a historic silk company in Como, where every day is realized a wonderful example of circular economy. From the liquid waste of the processing of fine silk yarns is extracted the Sericin M, a precious powder, unique in the world because pure and intact, masterfully used as an active ingredient of the beauty cosmetic line Luxury Silk Style, products capable of regenerating the skin tissue of 250% in 72 hours. The compelling story of this company will be told directly by its owner, Giada Mieli, who is part of the third generation of entrepreneurs in the field of silk, who decided, in 1999, to investigate the ancient beauty benefits of silk, not worn as a garment, but as a new, second skin. After the story of this adventurous journey will be offered a treatment by the operators of Wellness Como that directly in the premises of the factory will set up a spa, where guests can experience the luxury of benefiting from a magical treatment and then try directly, on their skin, the effects of these products at the company where they are created.
